Computer Science 2 Project
Group Progress Report
3rd Quarter

Week 2 - Jan 23, 2026

GOALState your goal for the Week
Improve the issues found regarding the issues in the code Make the second feature of the project program (attendance) Finalize the first feature of the program code

STRENGTH
Use of IDE and Github for collaboration and progress recording

AREAS FOR DEVELOPMENT
Dashboard of the program code Implementation of MySQL and whether if it is needed Figuring out how to implement the second feature of the program code Improving the program code's readability, ease of maintenance, and application of development principles

STRATEGY FOR SUCCESS
Plan and design a way to implement the second feature of the project code Address the issues found in the code

Team Members: Gabriel Aaron L. Alve

Claire L. Orejola

DATA COLLECTED State/list the data collected relevant to your project	PROGRESS State the progress you have made so far by the end of the week
Though the project's code works, there are serveral issues regarding password security, overuse of pack/pack_forget, unseparated use of logic from UI, password validation, etc.	Finished making the log in and log out feature Uploaded code to GitHub along with a changelog Added a Dashboard menu and Attendance Submenu
