Computer Science 2 Project
Group Progress Report
3rd Quarter

Week 3 - Jan 30, 2026

GOALState your goal for the Week
Finish the Methodology Document
Continue coding the attendance setting menu and settings menu
Improve code's readability and maintainability
Add descriptive comments to the code whenever relevant and sparingly
Update the PFD in the Github repository

STRENGTH

The code now hashes and salts passwords saved in users.txt
There is a draft of the methodology
The program menu is expanded

AREAS FOR DEVELOPMENT

The methodology document as it has a heavy weight for the Q3 project score
Finding time to code the program
The attendance's and setting's menus and functionality
Use of comments in the code
The readability and maintainability of the code

STRATEGY FOR SUCCESS

Find time for inserting sessions to work on project
Break down the goals set in the progress sheet into smaller goals
Achieve those goals and test the code

Team Members:

DATA COLLECTED State/list the data collected relevant to your project
Although frames help with organizing widget variables, using classes further helps this. Additionally, it is better to move the location of where login data is stored to a database for easier management of data

The variable naming convention in the code since it lacks descriptiveness

Gabriel Aaron L. Alve

Claire L. Orejola

PROGRESS
State the progress you have made so far by the end of the week

Added hashing for passwords when saved in the text file through bcrypt

Made the attendance menu and settings sub-menu, and made the create attendance menu that is in progress

Started making the methodology section
